

IMPORTANT REMINDER!

Please do NOT FLUSH feminine products of any kind, trash or “flushable” wipes.

We know, it says “flushable” right on the box, but this really isn’t the case. Tampons, pads, cotton balls/pads, wipes, and other “flushable-friendly” products take a toll on your treatment pump stations.

Unlike toilet paper, these products DO NOT break down once they are flushed.

We thank you for your cooperation.
