

**Job Title:**

Water/Wastewater Worker II

**Job Description:**

Control District water supply and distribution system. Inspect, test, and repair mechanical defects in all sizes and types of water meters, pressure regulators, backflow prevention devices, pumps, and distribution system pipelines. Keep accurate records of stock materials, tool inventories, and meter reading calculations.

Process District wastewater flow; including maintenance of sewer distribution grid and flood control basins. Make mathematical calculations for (and keep daily logs on) effluent flow totals and lab analyses. Also, perform semi-skilled to skilled maintenance duties as required (i.e., operate District backhoe, and welder). Maintain certifications deemed necessary by the District.

**Benefits:**

- Competitive salary based upon experience
- California Public Employees' Retirement System membership - 2% @62
- CalPERS 457 optional deferred supplemental income
- Social Security Benefits
- Eleven paid holidays per year;
- Paid Vacation, 80 to 160 hours - based on years of service
- Paid Sick Leave, 78 hours per year
- Health coverage; 80% paid by Company
- Paid \$50,000 Group Term Life Insurance coverage for Employee
- Annual Health Reimbursement Account
- Utility Standby Time for On-call Status
